THE STRONG & COLORFUL PALLET LINE

DOLAV MV Pallets

There are so many pallets on the market and at the first sight, it might be hard to distinguish the difference.

The MV series is a line of pallets produced with the well-recognized DOLAV quality. Due to their great strength, these pallets are ideal for intensive logistics use, heavy load storage and can easily withstand repeated abuse in handling during transit. DOLAV MV series pallets are the first choice of industries looking for handling solutions for different needs and applications.

Due to the wide range of options, every customer can create the right pallet to suit their specific needs...

Customize Your Pallet

And make it perfect for your specific needs.

Main features

- ✓ Strong and specially designed for heavy duty use
- ✓ Suitable for automated warehouses
- ✓ 3 integral runners
- ✓ Resistant to chemicals
- ✓ Fully recyclable

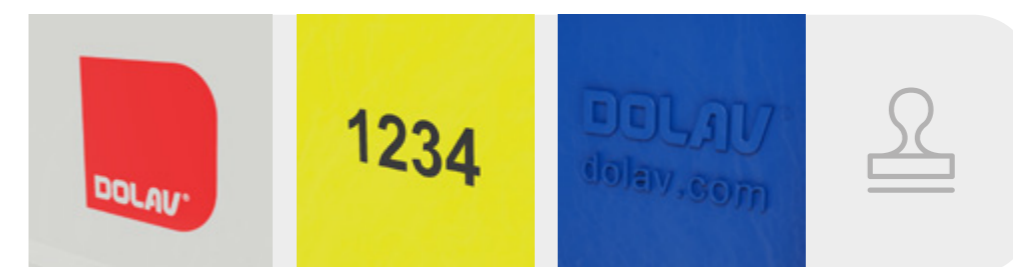

Reinforced Version

Heavy duty reinforced pallets for racking systems.

This sturdy pallet is designed for heavy-duty use with reinforcements to suit up to 2000 KG, in RACKING systems.

With steel reinforcements this pallet is also ideal for use in high-bay warehouses.

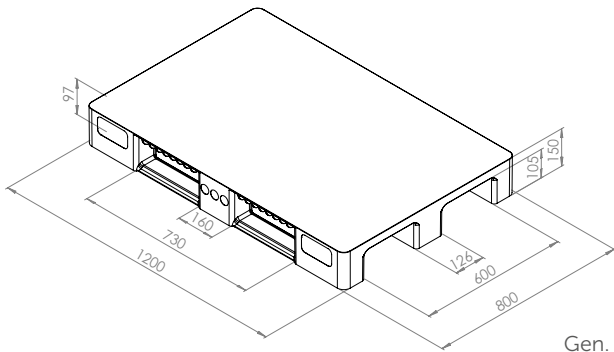

Logo options

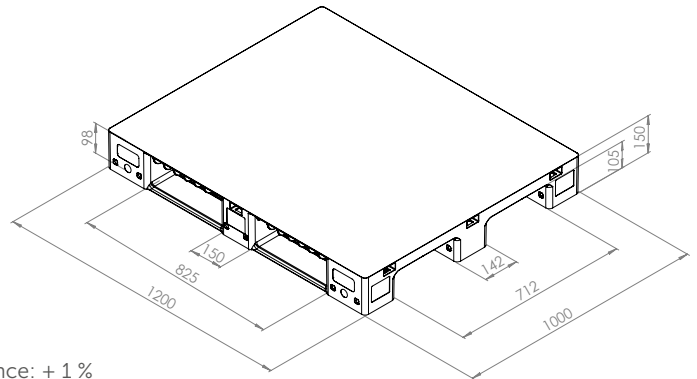

The company name, logo and sequential numbering can be hot stamped onto the Dolav for easy identification.

• Solid or Perforated version available in any size

• Available in recycled material

• Available in PP

- All loads refer to ambient temperature of 20°C.
- All loads refer to the weight evenly distributed over the entire pallet's upper surface
- "Static load" refers to a pallet placed on a flat and even surface, where all the pallet feet are in contact with the floor.

- "Dynamic load" refers to the pallet being raised by a standard forklift, where the forklift tines support the entire length of the pallet.
- Racking load" means that the pallet is placed on 2 parallel beams with all 3 feet of both long sides firmly standing on each beam.
- When planning automated logistic centers you are required to contact Dolav experts.
